DATE MAILED: 05/13/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/468,703

Applicant(s)

WANG, XI

Examiner

LEYNNA T. HA

Art Unit

2135

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 January 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 and 18-29 is/are pending in the application.
- 4a) Of the above claim(s) 16 and 17 is/are ~~withdrawn from consideration~~ cancelled.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-15 and 18-29 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

Art Unit: 2135

DETAILED ACTION

1. Applicant has amended independent claims 1 and 15.

Applicant added new claims 21-29 and has cancelled claims 16-17.

2. Claims 1, 4-7, 12-15, 19-21, and 24-29 are rejected under 35

U.S.C. 102(e).

Claims 2-3, 8-11, 18, and 22-23 are rejected under 35

U.S.C. 103(a).

This is a Final rejection necessitated by new grounds of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 4-7, 12-15, 19-21, and 24-29 are rejected under 35

U.S.C. 102(e) as being anticipated over Wright, et al. (US 6,084,969).

Art Unit: 2135

As per claim 1:

Wright, Et Al. disclose a public, non-commutative method for encoding an original message to be passed a recipient by way of a grantor, the method comprising the steps of:

obtaining an encrypted message representative of the original message, the encrypted message having been encrypted with a public key corresponding to the grantor according to a public key encryption scheme; **[col.7, lines 4-5 and 64-65 and col.10, lines 4-8]**

generating a public proxy key based on a private key corresponding to the recipient and on the private key corresponding to said grantor, wherein said grantor's private key and said recipient's private key are combined, and the combination of the private keys is based on said public key encryption scheme and provides that it is computationally difficult to recover the recipient's private key from the public proxy key even with the knowledge of the grantor's private key; and **[col.5, lines 2-4]**

applying the public proxy key to transform the encrypted message into a transformed message **[col.4, line 66 – col.5, line 1]**, wherein the transformed message is decryptable by the recipient using information selected from the private key corresponding to the recipient and the available public key information. **[col.4, lines 65-66 and col.10, lines 3-6]**

As per claim 4 : See col.14, lines 17-20; discusses the receiving, generating, and applying steps are performed by the grantor.

Art Unit: 2135

As per claim 5: See col.12, lines 55-59; discussing the providing the transformed message to the recipient.

As per claim 6: See col.12, lines 4-7; discusses decrypting the transformed message using information selected from the private key corresponding to the recipient and any available public information.

As per claim 7: See col.12, lines 4-7; discusses decrypting the transformed message using information using the private key corresponding to the recipient.

As per claim 12: See col.11, lines 47-56; discussing the encrypted message comprises a first portion and a second portion, the first portion encoding the original message, a generator, and a random key, and the second portion encoding the public key corresponding to the grantor and the random key.

As per claim13: See col.14, lines 17-20; discussing the applying step operates on the second portion of the encrypted message.

As per claim14: See col.8, lines 37-55; discussing the original message is passed to a recipient through at least one additional intermediate grantor by repeating the generating and applying steps for each additional intermediate grantor.

As per claim 15:

Wright disclose a public, non-commutative method for encrypting an original message to be passed a recipient by way of a grantor, the method comprising the steps of:

obtaining an encrypted message representative of the original message, the encrypted message having been encrypted with a public key corresponding

Art Unit: 2135

to the grantor according to a public key encryption scheme; **[col.7, lines 4-5 and 64-65 and col.10, lines 4-8]**

generating a public proxy key based on a public key corresponding to the recipient and on the private key corresponding to the public key of said grantor, wherein said grantor's private key and said recipient's public key are combined, and the combination of said grantor's the private key and said recipient's public key is based on said public key encryption scheme; and **[col.5, lines 2-5 and col.7, lines 64-67]**

applying the public proxy key to transform the encrypted message, into a transformed message **[col.4, line 66 – col.5, line 1]**, wherein the transformed message is decryptable by the recipient using information selected from the private key corresponding to the recipient's public key and available public key information. **[col.9, line 48 – col.10, line 8]**

As per claim 16: Cancelled

As per claim 17: Cancelled

As per claim 19: See col.12, lines 4-7; discussing the message is decryptable by the recipient using information selected from the private key corresponding to the recipient.

As per claim 20: See col.8, lines 37-55; discussing the original message is passed to a recipient through at least one additional intermediate grantor by repeating the transforming step for each additional intermediate grantor.

As per claim 21: See col.3, lines 28-33; discussing it is computationally difficult to recover the grantor's private key from the public proxy key.

Art Unit: 2135

As per claim 24: See col.14, lines 17-20; discussing the receiving, generating, and applying steps are performed by the grantor.

As per claim 25: See col.5, lines 46-48; discussing obtaining said recipient's private key by said grantor.

As per claim 26: as rejected in claim 18.

As per claim 27: See col.3, lines 28-33; discussing it is computationally difficult to recover the grantor's private key from the public proxy key.

As per claim 28: See col.10, lines 4-8; discussing public encryption scheme is a discrete-logarithm-based encryption scheme, wherein said combination of said private keys comprises using the modular difference of both private keys as an exponent in a modular exponentiation.

As per claim 29: See col.5, lines 46-48; discussing obtaining the recipient's private key by the grantor.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-3, 8-11, 18, and 22-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wright, et al. as applied to claims 1 and 15 above, and further in view of Mitra (US 5,748,736).

As per claim 2:

Wright discloses a public- private encryption method wherein uses private keys and public keys for encryption and decryption (col.7, lines 59-65). However, Wright fails to include an ElGamal encryption scheme.

Mitra teaches decrypting the encrypted message and then re-encrypting the message along with digitally signing the messages. Mitra discloses that the procedures of digitally signing the messages utilizing the ElGamal scheme wherein is well known in the art for supporting source authentication and sender non-repudiation (col.10, line 62 thru col.11, line 3).

Therefore, it would have been obvious for a person of ordinary skill in the art to modify Wright is to include the ElGamal encryption scheme because digitally signing the messages supports authentication and sender non-repudiation.

As per claim 3: as rejected in claim 2.

As per claim 8: See col.11, lines 47-56; discusses the encrypted message comprises a first portion and a second portion, the first portion encoding a generator and a random key, and the second portion encoding the original message, the public key corresponding to the grantor, and the random key.

As per claim 9: See col.14, lines 17-20; discussing the applying step operates on the second portion of the encrypted message.

As per claim 10: See col.11, lines 47-56; discusses the encrypted message comprises a first portion and a second portion, the first portion encoding the original message, a generator, and a random key, and the second portion encoding the public key corresponding to the grantor and the random key.

As per claim 11: See col.14, lines 17-20; discussing the applying step operates on the second portion of the encrypted message.

As per claim 18: Wright discloses a public- private encryption method wherein uses private keys and public keys for encryption and decryption (col.7, lines 59-65). However, Wright fails to include a Cramer-Shoup encryption scheme.

Although, Wright fails to include the ElGamal or the Cramer-Shoup encryption scheme, it is obvious to use anyone of these encryption schemes for purposes of additional security.

As per claim 22:

Wright discloses a public- private encryption method wherein uses private keys and public keys for encryption and decryption (col.7, lines 59-65). However, Wright fails to include an ElGamal encryption scheme.

Art Unit: 2135

Mittra teaches decrypting the encrypted message and then re-encrypting the message along with digitally signing the messages. Mittra discloses that the procedures of digitally signing the messages utilizing the ElGamal scheme wherein is well known in the art for supporting source authentication and sender non-repudiation (col.10, line 62 thru col.11, line 3).

Therefore, it would have been obvious for a person of ordinary skill in the art to modify Wright is to include the ElGamal encryption scheme because digitally signing the messages supports authentication and sender non-repudiation.

As per claim 23: as rejected in claim 22.

Conclusion

5. Applicant's arguments with respect to claims 1-15 and 18-20 have been considered but are moot in view of the new ground(s) of rejection.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2135

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LEYNNA T. HA whose telephone number is (571) 272-3851. The examiner can normally be reached on Monday - Thursday (7:00 - 5:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Vu can be reached on (571) 272-3859. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
